

**FORAGE FIRST™**  
WHEN YIELD AND QUALITY MATTER™

P R E M I U M  
**BLM #4**  
P A S T U R E M I X

BLM #4 Pasture Mix is a quick starting mix for use around farm buildings, drylots and pastures. This mix produces quality forage and will hold up well under heavy traffic.

- Very versatile mix that establishes quickly
- Endophyte-free tall fescue extends productivity into the hot, dry summer months
- Kentucky bluegrass provides sod-forming capability to help maintain a healthy stand

%	SPECIES	ESTABLISHMENT	PERSISTENCE	DROUGHT TOLERANCE	WINTER-HARDINESS	PALATABILITY	YIELD POTENTIAL	GRAZING TOLERANCE

**SUITABLE SOIL TYPES**

LIGHT MED HEAVY

**PLANTING RATE**

**new pastures:**  
30-40 lbs/acre  
**overseeding:**  
10-20 lbs/acre

**PLANTING TIMES**

Best in early spring or early fall when weather is cooler and moisture more reliable

**PLANTING ZONES**

Northern Tier States
